BRIEF SUMMARY

I'm an MCA student with a love for tech and a knack for languages like Java, HTML, CSS, PHP, and SQL. I'm passionate about creating digital solutions that are not only secure but also easy to use. My goal is to design systems that make a genuine impact, combining functionality with a smooth, user-friendly experience.

KEY EXPERTISE

Java HTML5 CSS PHP Basic SQL

10th | KSEEB | Percentage: 83.36 / 100

PROJECTS

Hospital Management

Key Skills: HTML5 CSS

The website is designed interactively to provide users with information about the hospital's expertise, experience, and hospitality. Patients can also receive daily updates on their queries and browse through the profiles of the doctors.

Online Crime Managemnt

Team Size: 4

Key Skills: PHP SQL

The Online Crime Management System is a user-friendly web platform designed specifically for filing online case, aimed at simplifying the reporting, tracking, and management of criminal incidents. Its primary goal is to enhance the efficiency of government agencies in handling crime-related issues and improving public safety.
